FIG. 11

This perspective view shows the cable assembly from a side-on perspective. The cable body is shown as a bundle of lines extending from the left. The cable head is a rectangular block at the end of the cable body. The cable head assembly is a complex mechanical structure that connects the cable head to the cable body. It features a central pivot point and several internal components, including a spring and a locking mechanism. The cable head assembly is shown in a partially open position, revealing the internal components.
